25X1A [redacted] EO/OSI

Walt:

25X1A
25X1A

Attached is a note from [redacted] OCI, which requests the briefing on the general problems involved in preventing the diversion of nuclear materials to unauthorized uses and questions on the U.S. safeguards systems. Jim discussed this with me personally, and I suggested he write this type of memo to explain just what their interest was and the reason for requiring such a briefing. Will OSI be able to accommodate them? If you wish, I can put Jim directly in touch with you.
